

Lyth-Instrument Oy

HYGIENIC BALL THERMOWELLS

Lyth-Instrument Oy has developed a ball thermowell suitable for industries that require high hygiene. The ball thermowell can be welded to any position to minimize flow resistance. Due to the design of the ball thermowell, the adhesion of bacteria to the surface is low. The surface of the ball thermowell is cleaned better and faster with less detergent

Hygienic ball thermowells

Material
AISI 316L

Instrument connection
G 1/2" internal thread, optional G 1/4"

Material certificate
EN 10204-3.1

Thermowells	Immersion depth
QPLR2-30	30 mm
QPLR2-100	100 mm

Length	L1	L2
QPLR2-30	102	84
QPLR2-100	202	84

Other immersion depths on request
